PILOT BASINS - Rivers Guadalquivir & Guadiaro

Carlos Fernández-Delgado
University of Córdoba

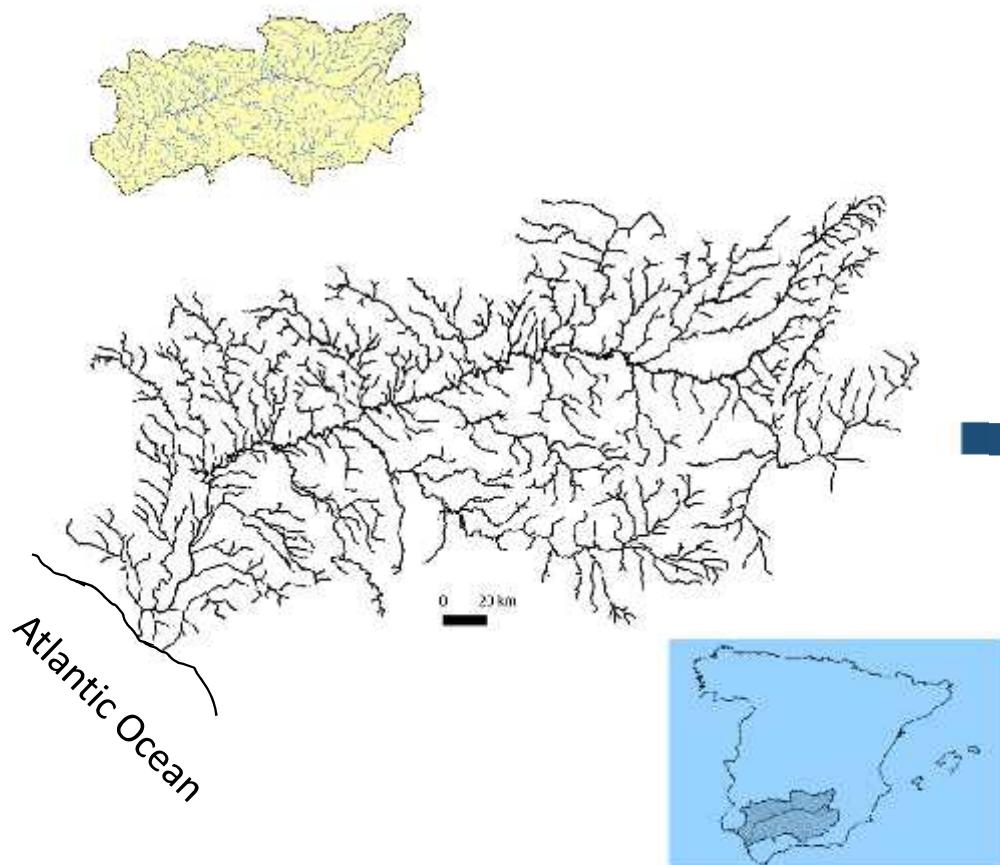

EMUs in Andalucía

River Guadalquivir

The river basin

River length – 668,3 km

River basin area - 57527 km²

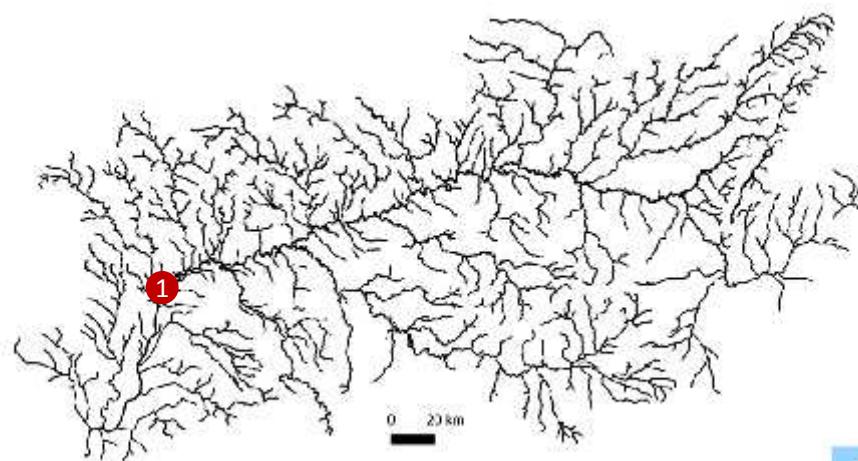

41 main tributaries

Estuarine length

- 60 km (Summer)
- 0-20 km (Winter)

Obstacles to migration

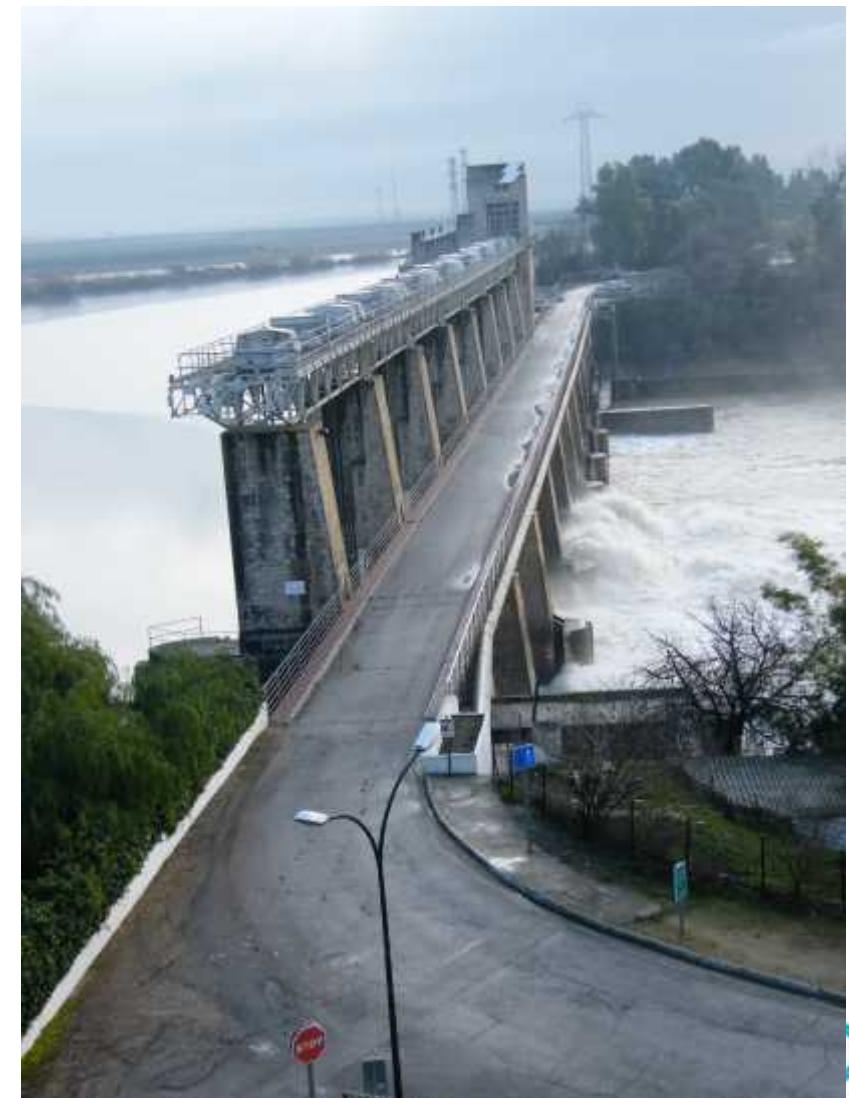

Obstacles

- ① Alcalá del Río dam
(Main River bed)

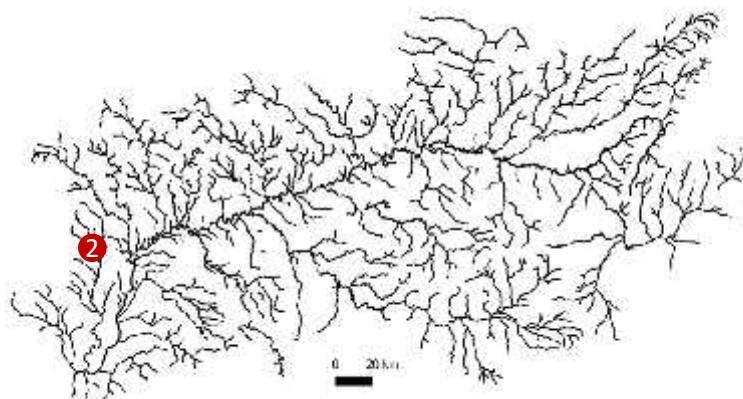

Alcalá del Río dam

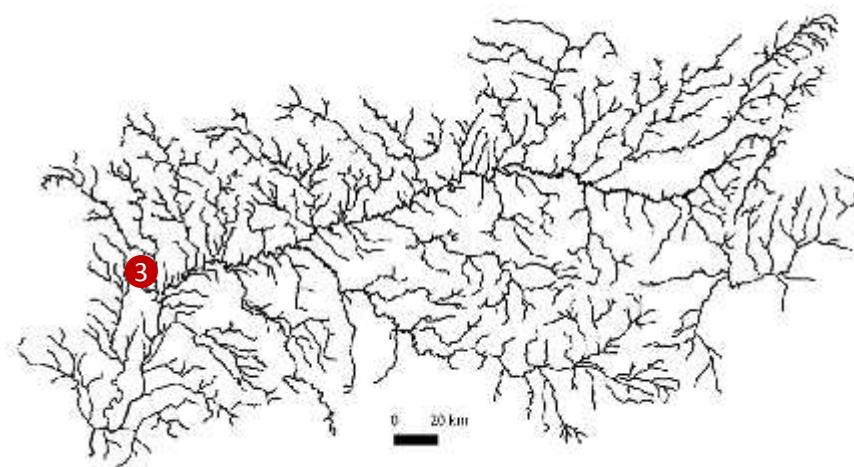

SUDOANG
SUDOCO

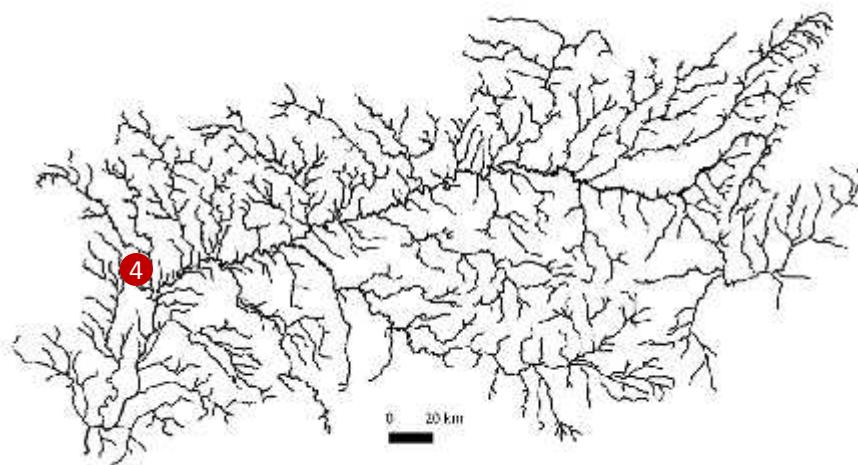

Agrio dam

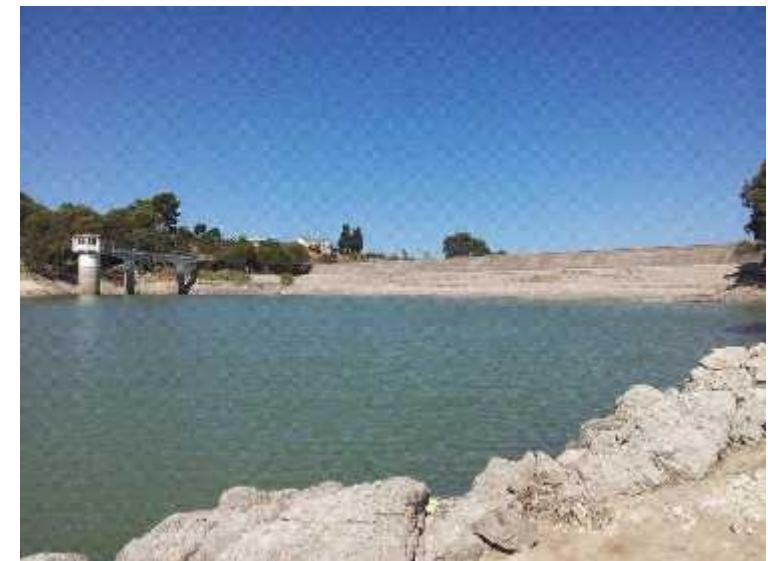

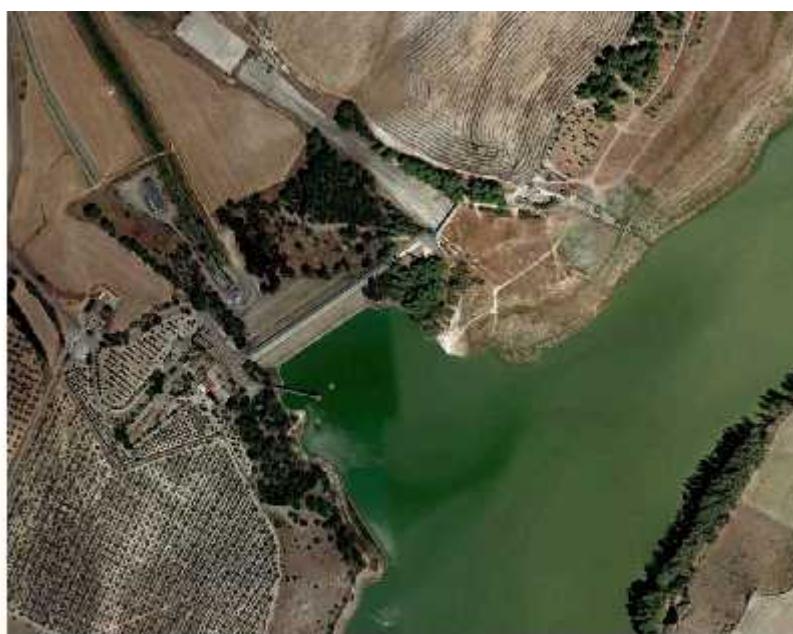

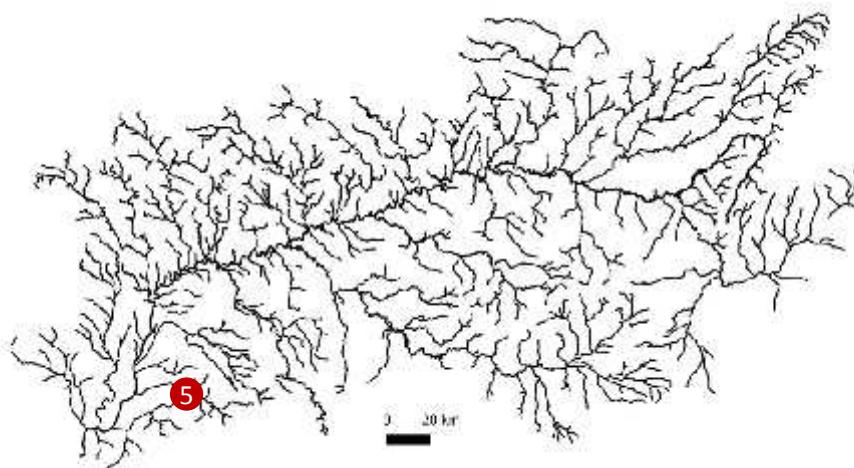

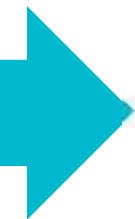

El Gergal dam

El Esparragal dam

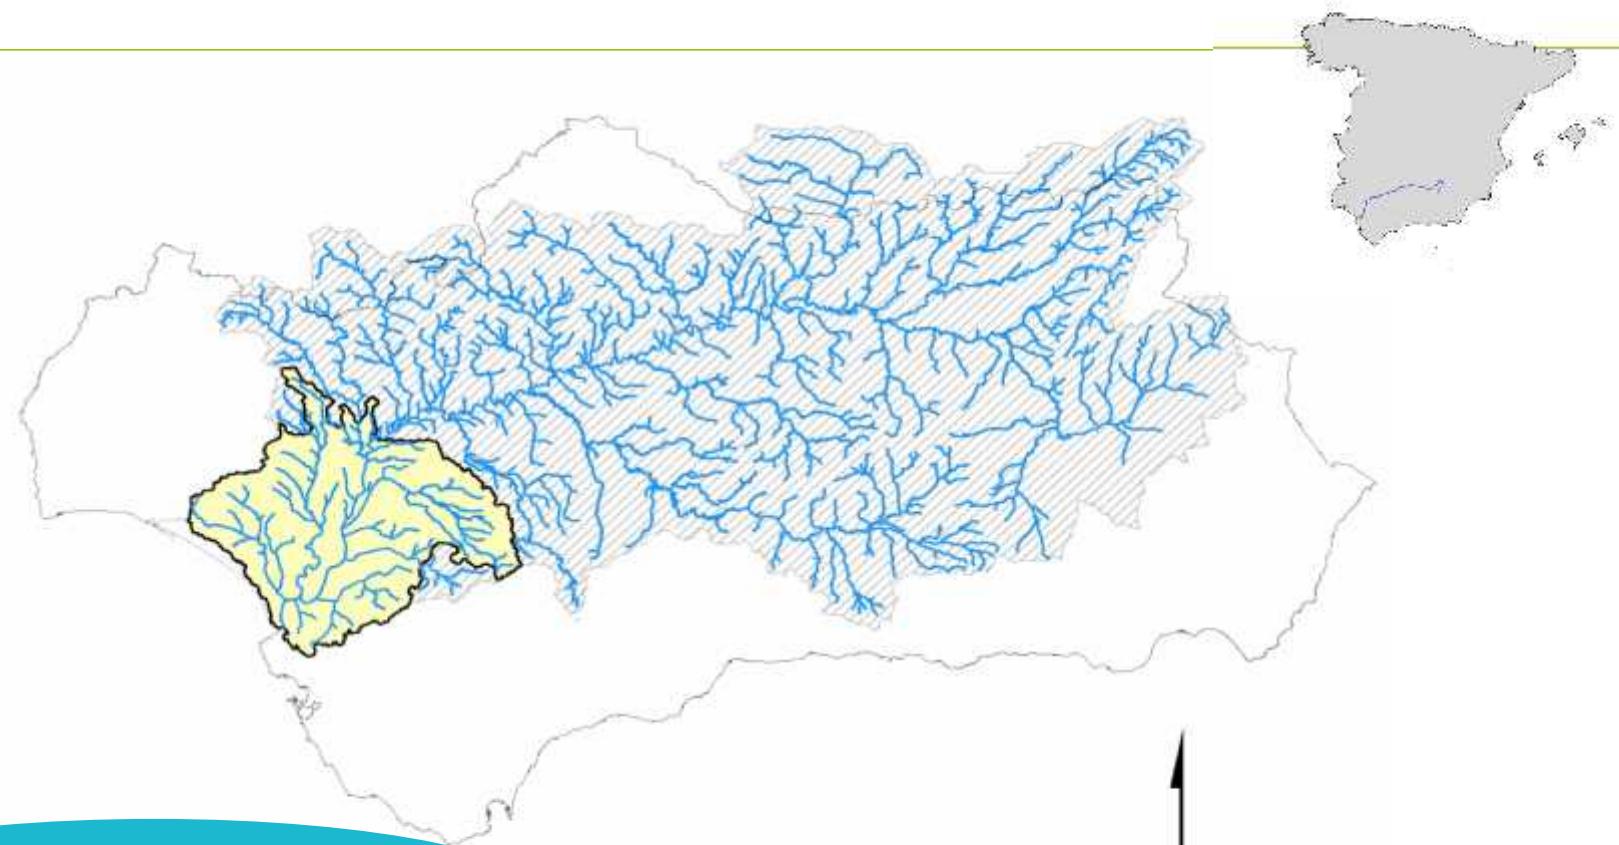

Torre del águila dam

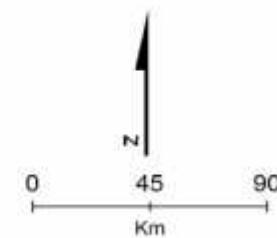

River Guadalquivir

Obstacles to migration

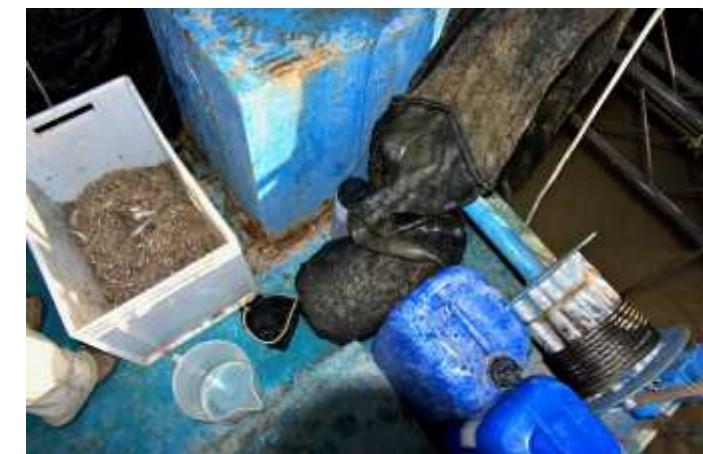

Accessible area 26% of the
original river basin

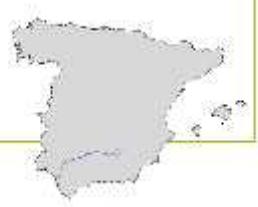

River Guadalquivir

The eel fishery

River Guadalquivir

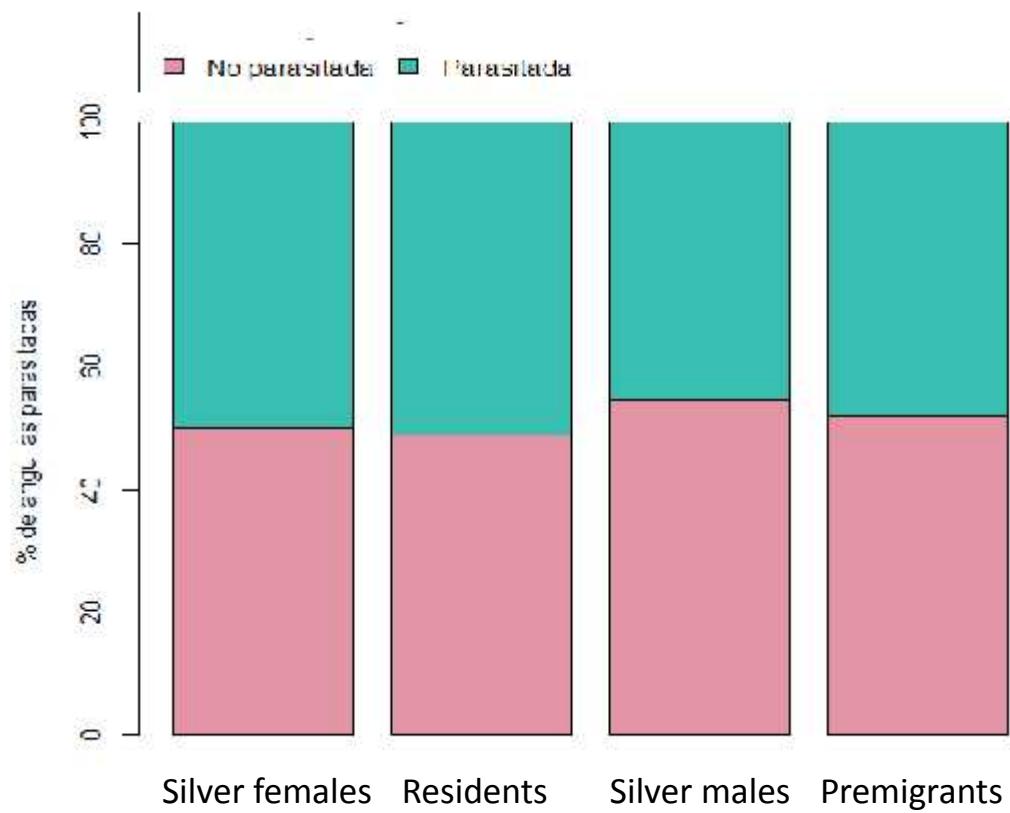

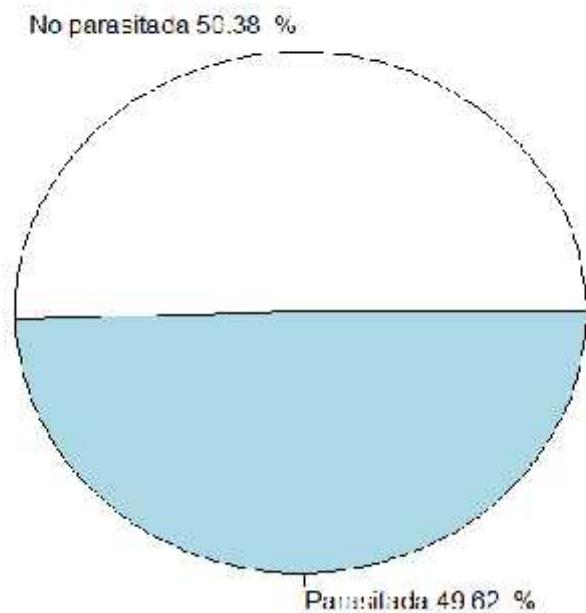

The eel fishery

Other pressures on the eel

Proporción de anguilas parasitadas Marisma

June 1997-December 2006

Recruitment

(Estuary / glass eels) Jan/2013-May/2015

Length, weight, stages (n=16176)

Abundance, salinity, Temp, winds, etc.

No monitoring at these moments: lack of money

River Guadiaro

The river basin

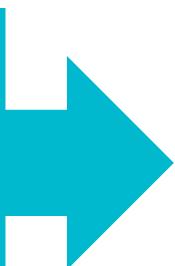

River length – 82 km

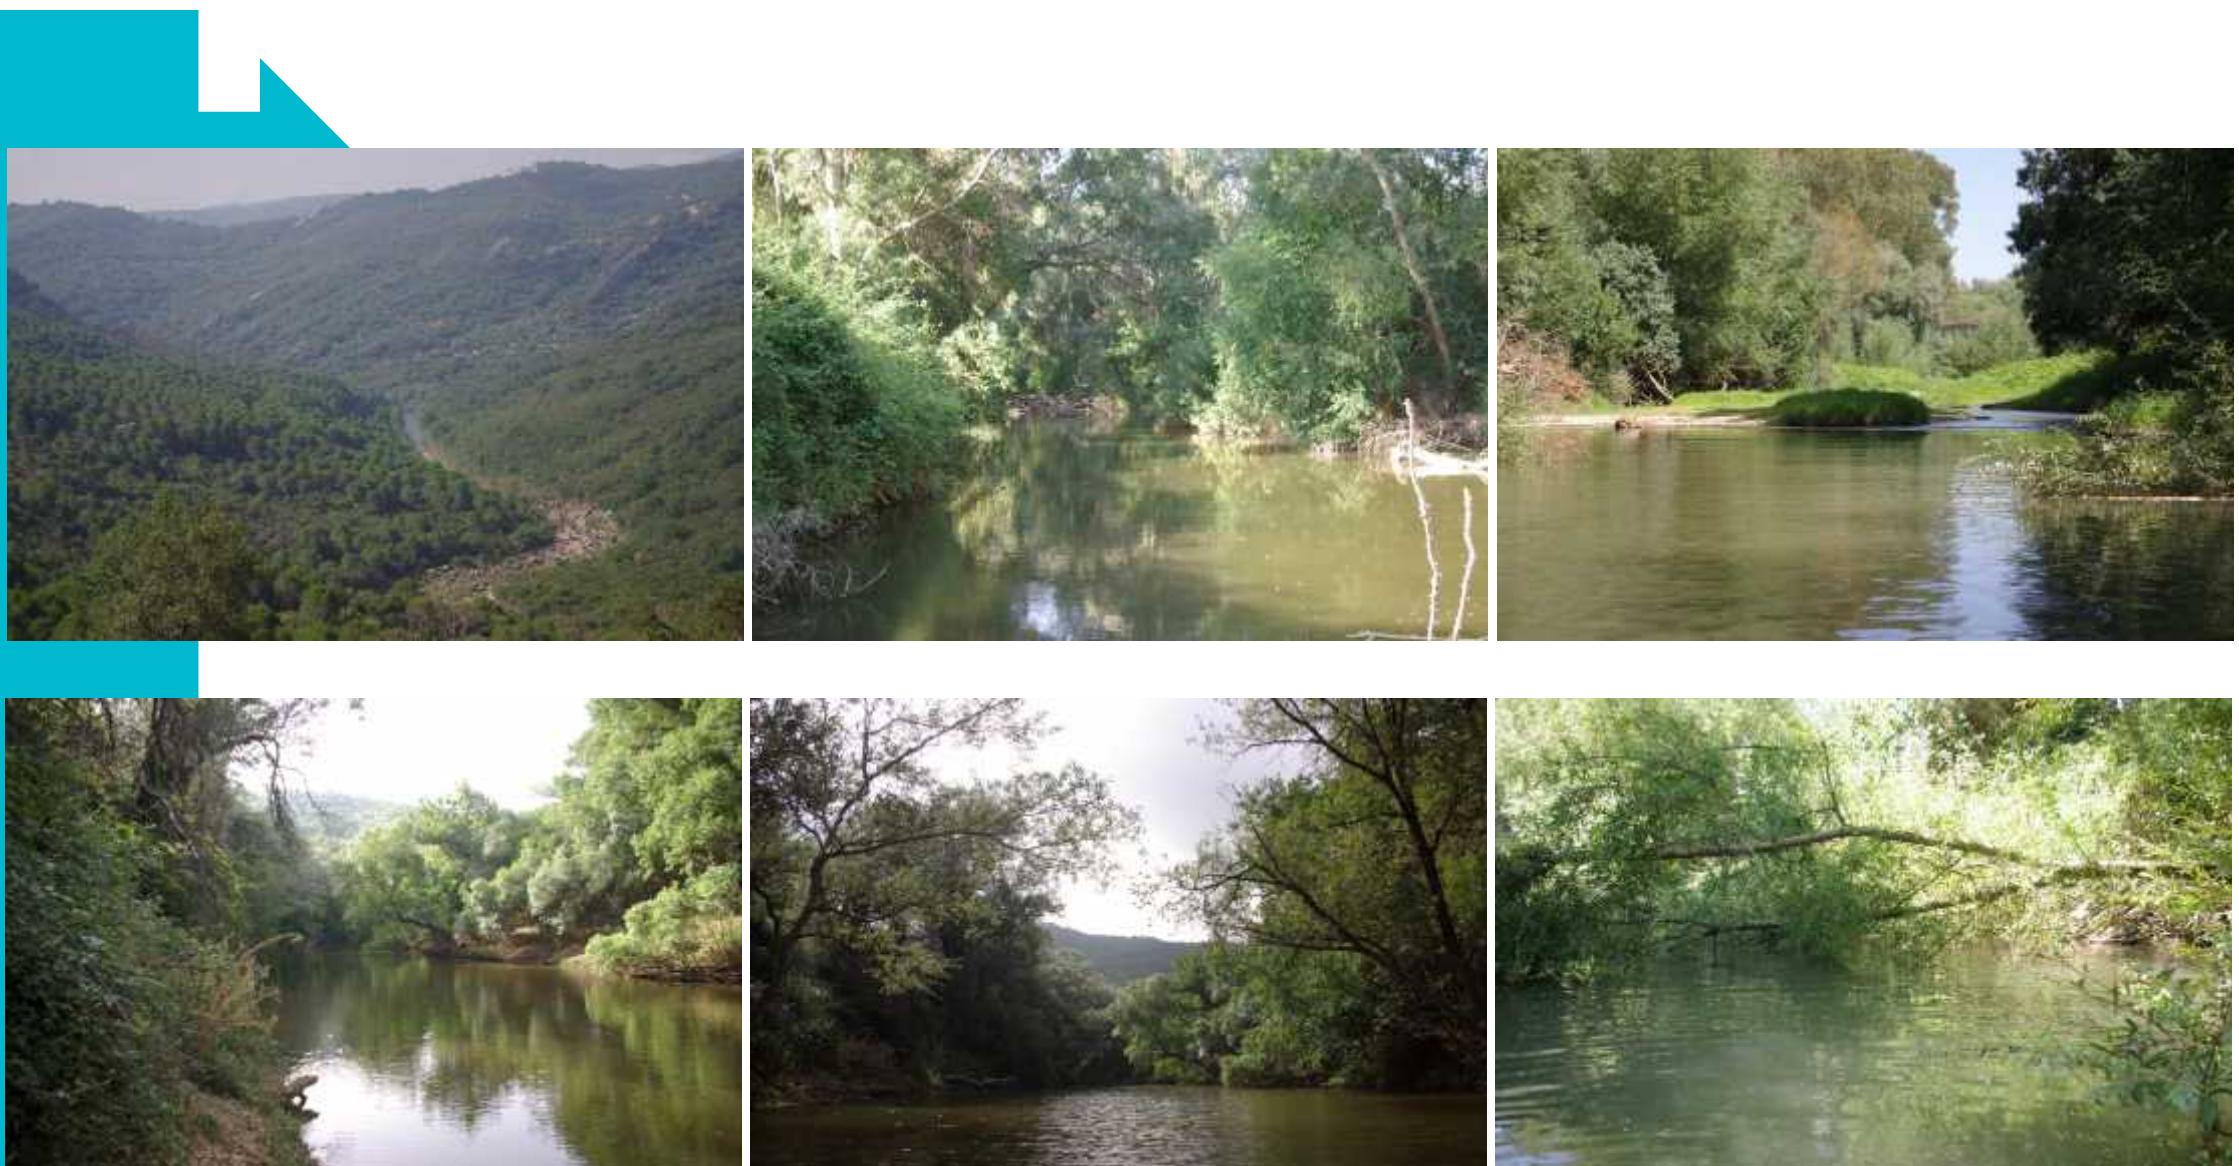

River basin area - 1505 km²

Estuarine length

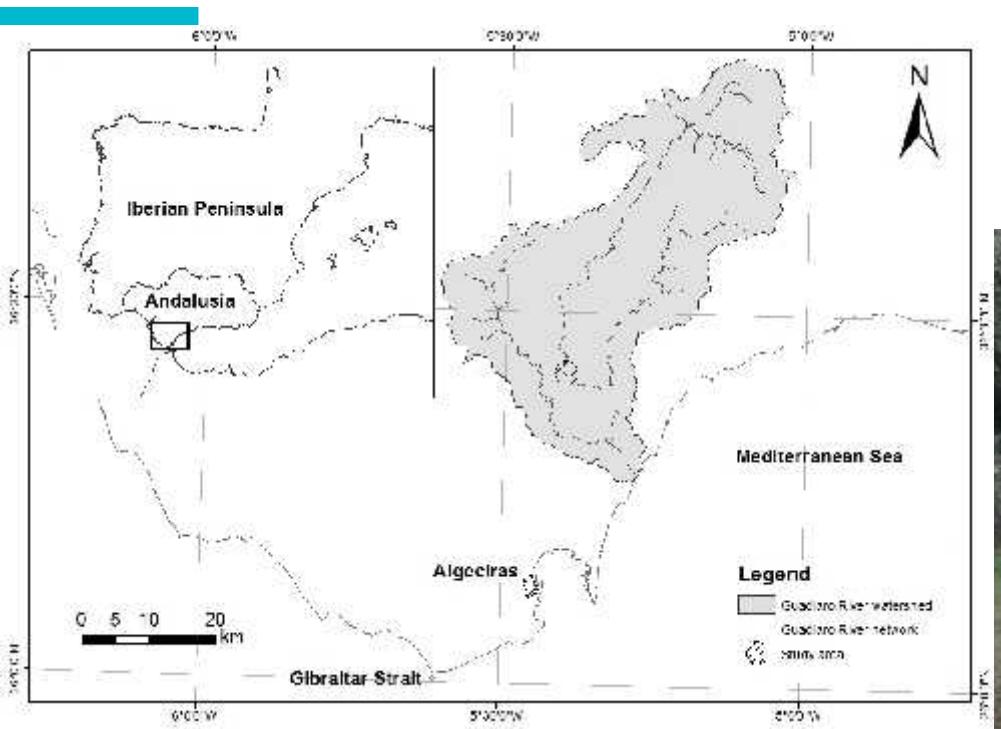

- 4 km (Summer)
- 0 km (Winter)

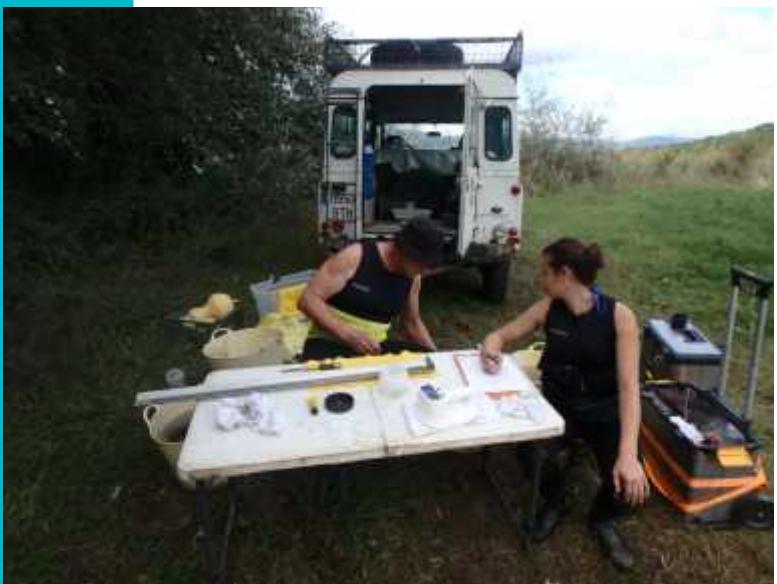

Without any relevant obstacle

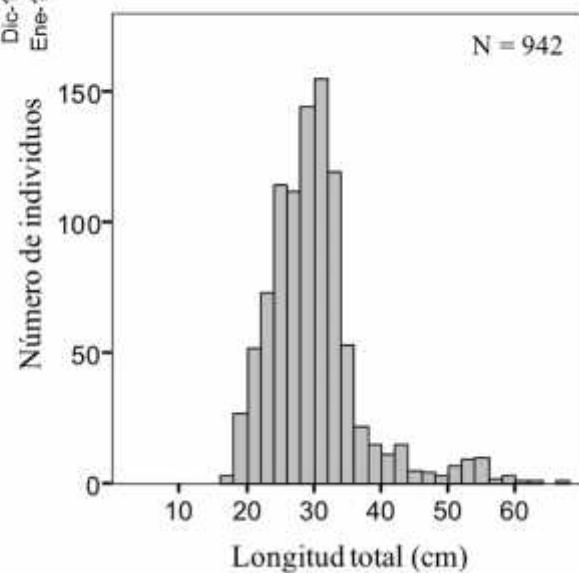

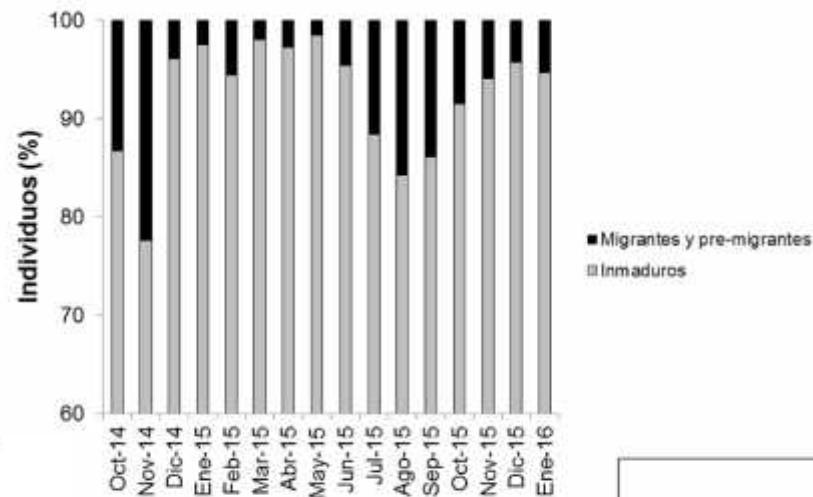

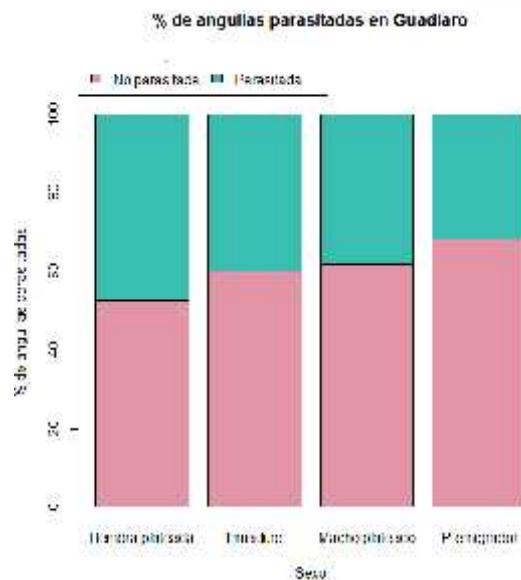

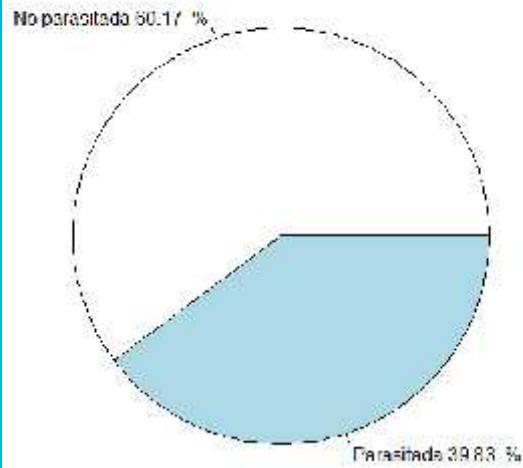

SUDOANG

Age, growth, condition, sex ratio, silvering process,
Seasonal movements (Mark-recapture)
Biomass & productivity

Proporción de anguilas parasitadas en Guadiaro
